The three items I have were a pocket knife, a lighter, and a life straw. The reason why I chose a pocket knife is that because I’m going to need to kill animals for food and also cut some wood to make a shelter. The reason why I chose a lighter is because once I cut down wood with my pocket knife I could make a fire to stay warm during cold nights. The reason I chose a life straw is because a life straw can make you drink out of any water source because it can take out bacteria from 99.99% of the time. I think I would be able to survive with just these items until help arrives to get me off the island. These were the reasons why I would take these three items with me.
