Pappus of Alexandria.

By hootie
Life

He had a son named Hermorodus.

He was born in Alexandria

He was born in 290 AD to 350 AD

He was also known to be a teacher
Mathematical accomplishments

Pappus did not make any discoveries but was an encyclopedist. With this he helped preserve the works of dead empires in his book the Synagogue. And each book contained different aspects of math.
Mathematical accomplishments

This is important due to it keeping records of ancient math such as the Roman Empire’s mathematical knowledge. With this as well he inspired Isaac Newton's theories and other things.
Timeline

- Birth: 290
- Wrote his books: 340
- Death: 350
