Middle School Art

Spring Showcase
Middle School Art

This year, Middle School Art students were exposed to a variety of art making techniques in 2D and 3D media. Students gained a deep understanding of the 7 elements of art: line, color, shape, form, value, space and texture. While exploring each element of art students were exposed to various mediums including pencil, pastel, paint, watercolor, and recycled materials. Each artist has his or her own process and style and throughout this course students dove into their own imagination to discover who they are as a creative beings.
A note to the Artists of the Winston School:

I am so proud of each and every one of you! It has been a pleasure teaching and guiding you through your creative journey this year. Thank you for welcoming me to the Winston community and making me feel at home. You are amazing and have taught me so much! Imagine, Create, Inspire! -Ms. Kitty
I really enjoyed doing painting activities in Art this year at Winston. I liked painting flags, like the one I painted of Turkey.
Turkey Flag

This flag has a crescent and a star on it. I liked painting this flag because I liked that it had a crescent like the moon on it. I also liked the color red.
I liked drawing this because I like planes. I like Boeing 747’s. I used color pencils.
We were drawing a picture of ourselves for art. I drew me. I used markers and colored pencil. I made my hair color green because that’s my favorite color.
My Favorite Art

Peter L
Group color field project

This was my favorite project because I got to work together with someone and we both got the share our ideas. I call this piece “fall”.
This is called my favorite characters. I made this one because I wanted to show what I like!
I used different colors to make 3D looking letters that spell Fortnite.
This is the unicorn stone. I used paint and LOTS OF GLITTER on this stone.
Texture project

This is my really weird texture Project that I just basically got a piece of cardboard and started glue gunning things on it and it became a
Naia S

I learned about a lot of cool art stuff this year. My favorite part about art is painting.
Naia S

This piece was my coolest project I made. I liked using oil pastels and watercolor.
Naia S

I liked using all different colors of paint for this piece to create different paints and textures
Naia S

This is my earth day project and is my special piece of art.
One of my favorite things about art is the details people put into it. Another favorite thing about art is the different perspectives people have about it. This year I have learned a lot about how 3D art works like for example, you can make something smaller to make it look farther away or draw it higher on your paper to make it look further. Or if you draw it a certain way you can make it a 3D shape. A memory I enjoyed from class was making a Clone Trooper helmet out of parts from a magazine.
This is a COVID comic relief and I did this assignment for extra credit because I felt like drawing. This picture is about a king sitting on his throne but it’s actually just a person sitting in quarantine. I just used a paper and a pencil. He’s holding hand sanitizer and his throne is made of toilet paper. I learned it is hard to draw 3D shaped chairs, especially when someone is sitting on it.
This project is called Perspective Project. For this project I decided to draw the Empire vs. Rebels with AT-ATs and rebel X wings. And it is drawn to point toward the rebel base. I used only a paper and pencil. My favorite part was drawing the AT-AT.
Saturn V Lego Build

This is the Lego idea Saturn V set and it comes with a mini lunar landing and mini moon with mini space people. It even has a miniature landing craft. The materials I used were Legos and the instructions. My favorite part of the project was working on the first section because it was the most detailed.
I like art because I am able to recreate historical moments that are important to me.
This is a piece I created when learning about texture. It is a lion!
This is a Christian piece with a muslim design
This represents 3 kingdoms. I used the primary colors
Art spring showcase project.

By David M
Texture

I made a red headed man with golden eyes. I made him out of red yarn and golden buttons. Then I hot glued them on a paper. I drew the paper first. It was to show where they’re supposed to go. I put the red yarn first and the golden buttons last. It was supposed to feel wool and buttons. It was hard but I accomplished my achievement. It was for a texture project. And that is my first art project.
Mandala

I made a spider man mandala. I drew it in a circle. Then I drew out the web patterns. Then I drew over the pencil drawn web patterns with permanent marker. I colored it with red and blue. I added the eyes. Then I wrote “The spider man mandala.” on it. And that completes my second art project.
Group color field.

My third art project is with a group, It was with Leo, Moses, and Carter. They did the green, orange, yellow, and blue. I did the red and purple. We painted them on separate pieces on one giant piece of paper. And that is my third art project.
Warm and Cool colors.

I made a warm and cool colors for my 4th art project. I drew my hand on a piece of paper. Then I gave it layers. I colored my hand with warm colors. I colored the background with cool colors. The warm colors were red, yellow, and orange. The cool colors were green, blue, and purple. I used markers to color them. And that is my 4th art project.
Conclusion

This is my art projects. I hope you enjoyed them. It took a lot of hard work and effort. They are very vibrant and colorful. What is your art projects?
THANK
FOR WATCHING

My Art Showcase

By Daniel

Date: 5/4/20
Art this year.

I have learned a lot of art during the first half of this year. It was super fun and I made awesome drawings. The following slides are the 3 of my favorite art works I’ve done. This is all thanks to the teacher Ms. Kitty she is super helpful and showed us how to do art.
Art #1

My first art work I would like to share is my Mandala. Basically, a Mandala is a mix of symbols. These can be super relaxing and good for your brain if you’re stressed out. I put the number 2020 because I did this at the end of last year or decade. I drew SpongeBob since it’s my favorite tv show.
Art #2

My second art I want to share is paper painting. This was because we learned about this artist named Matisse who invented paper cutting. I cutted a building and a mountain with trees and clouds.
My third and final art I want to share is my final color project. In this project I learned about primary colors (red, blue, yellow) and how to mix them to secondary colors (green, orange, purple) and blended them into this lovely painting.
In conclusion, I really enjoyed art class. I maybe will come back in the future if I don’t end up in Drama. I painted, made paper art, and made my own Mandala. I really had fun this first half of this year. Thanks to Ms. Kitty I have gotten much better at art. Thank you so much. This is my art.
Thank you for watching-I hope you enjoyed the show!
