Marine biologist

Naia
I chose this because I want to learn about the ocean.
They study life in the ocean such as wales, fishes and organisms.
Marine Biologists Careers

• To become a marine biologist you have to go to college
• They probably will get a Masters or a PhD
• Salary is $36,000 to $90,000 per year
• Probably have to learn to scuba dive
How the career relates to science

Marine biologists study biological oceanography and the associated fields of chemical, physical, and geological oceanography to understand marine organisms.
What you have learned by researching the career

• I learned that marine biologists test plants and organisms

• We need to protect the animals and plants organisms and the ocean
