

SURVIVAL BACKPACK

3/20/20

If I was stranded on an island, I would bring these 3 things with me: a mallet, a blanket, and a med kit. I would bring a mallet because if I was stranded there, maybe I could knock something down close to me or build shelter with it. I also could defend myself or kill animals for food if I needed to. The blanket I would bring so in cold nights, I could stay warm and cozy. I could sit on it or tie it into a rope. Lastly, I would bring a med kit because if I hurt myself, I could use something in there to help it heal. These are the best things that I could've brought. besides bacon. to help me survive on an island.
