Yellowstone National Park

By: Scarlett L
Fact 1. Yellowstone became the world’s first ever national park on March 1st, 1872.
Fact 2.

Yellowstone covers 3,472 square miles. This makes it larger than Delaware and Rhode Island combined.
Fact 3. Yellowstone is home to 67 different species of mammals. This makes it the place with the largest amount and variety of mammals in the lower 48 states.
Fact 4. There are about 1000 miles of hiking trails in Yellowstone park.
Fact 5.
The Yellowstone River is the longest undammed river in North America.
Fact 5. Yellowstone is home to over 500 active geysers. The most famous of these 500 geysers is Old Faithful.
Fact 6.

Yellowstone’s hottest geyser basin is Norris Geyser basin. When a research drill made a hole at the basin, they found that the temperature reached a temperature of 459 Degrees fahrenheit at a depth of only 1,087 feet!
Fact 7. There are 285 species of birds that can be found in Yellowstone Park.
